Desk Pods

Connectix Express 4 Way Unloaded Desk Pod
 Connectix Express 6 Way Unloaded Desk Pod
 Connectix Express 8 Way Unloaded Desk Pod

Floor Boxes

Connectix Express 4 Way Unloaded Floor Box
 Connectix Express 6 Way Unloaded Floor Box

The Connectix Express System has been designed to offer the easiest and quickest method of installing copper links.

Connectix has designed the Express System with flexibility in mind, and is suitable for everyone's needs. It is made bespoke to customers' requirements and is ready for installation.

Connectix Express components are supplied pre-labelled with specified numbering schemes, making installation a case of matching the numbered outlets to the numbered ports and snapping them in.

There is a wide range of high performance connectivity panels, boxes, panels or pods available. Supplied unloaded, they are ready for pre-terminated Connectix Express sockets to be slotted in on-site.

Desk Pods

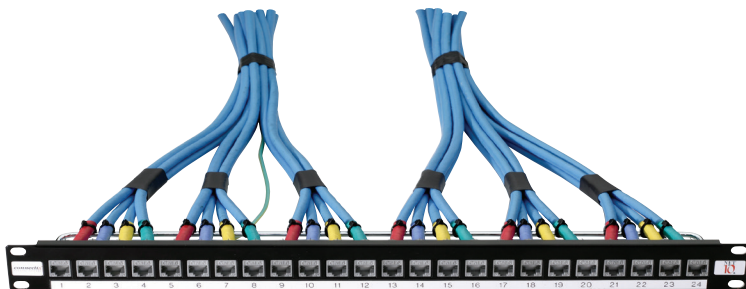

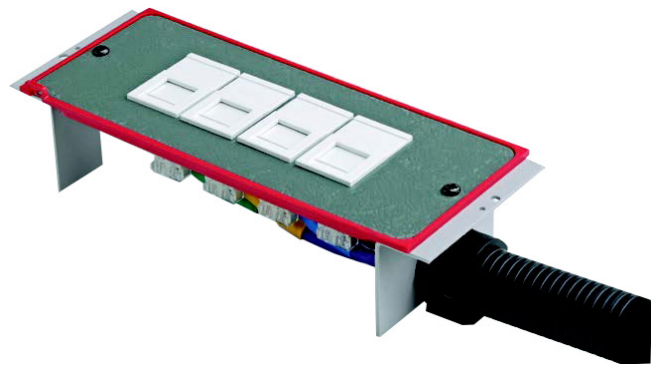

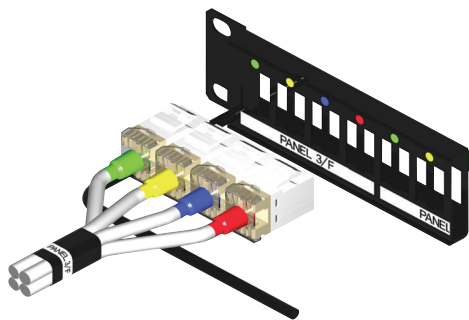

Available with 4, 6 or 8 shuttered outlets.

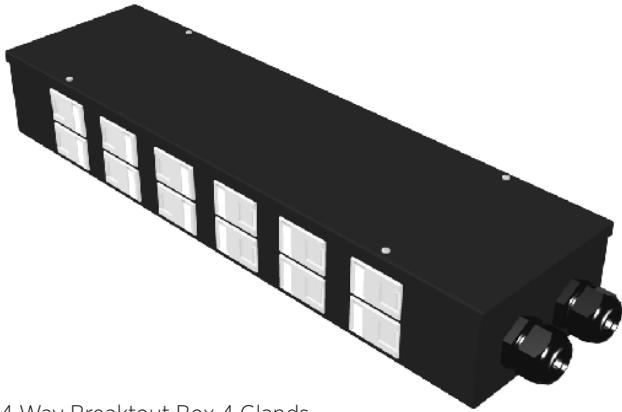

Floor Boxes

Available with 4 or 6 shuttered outlets.

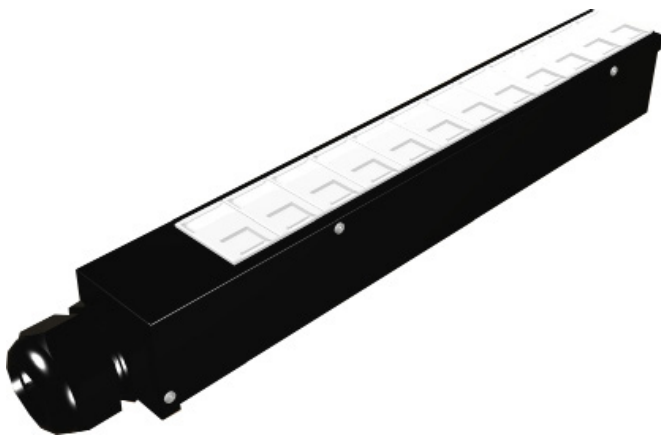

Patch Panels

Cat 5e, Cat 6 & Cat 6A performance patch panels are available, suitable for 4, 6 or 12 pre-terminated sets.

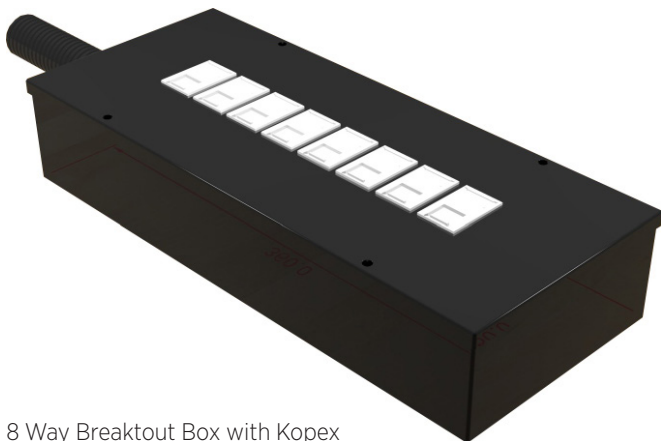

24 Way Breakout Box 4 Glands

LJ6C 12 Way Breakout Box

8 Way Breakout Box with Kopex

Custom GOP boxes are designed to provide a cost effective method of patching cable in situations where equipment racks or cabinets are not available.

Connectix has designed the custom GP box service with flexibility in mind, and is suitable for everyone's needs. The boxes are made bespoke to customers' required specifications and are ready for quick and easy installation.

There is a wide range of high performance connectivity options available. Supplied loaded or unloaded, they are ready for pre-terminated Connectix Express cable to be slotted in on-site.

Most commonly supplied with LJ6C modules, custom GOP boxes can also be designed to fit Euro modules. Modules can be fixed to either the top or side of the box dependent on requirements.

Custom GOP boxes are available in tough and lightweight ABS or mild steel for more demanding situations.

- Available from 2 - 36 way
- Wide choice of loaded/unloaded panels and outlets
- Suitable for UTP and FTP
- Bespoke port designation labels
- Individual assemblies labelled with panel identities
- Colour coded port identities
- Fully customisable

Ordering Information

As each GOP box is completely custom, please contact us with all your required specifications: sales@connectix.co.uk

The Connectix Express System has been designed to offer the easiest and quickest method of installing Copper links.

With more and more installation jobs becoming time critical, minimising on-site termination time has never been more crucial.

With Connectix Express, all the time consuming terminations are made, tested and labelled in a quality controlled factory. All the installer has to do is mount the unloaded panels into a cabinet, pull in the pre-terminated links, mount the sockets into the unloaded panel and outlets where required.

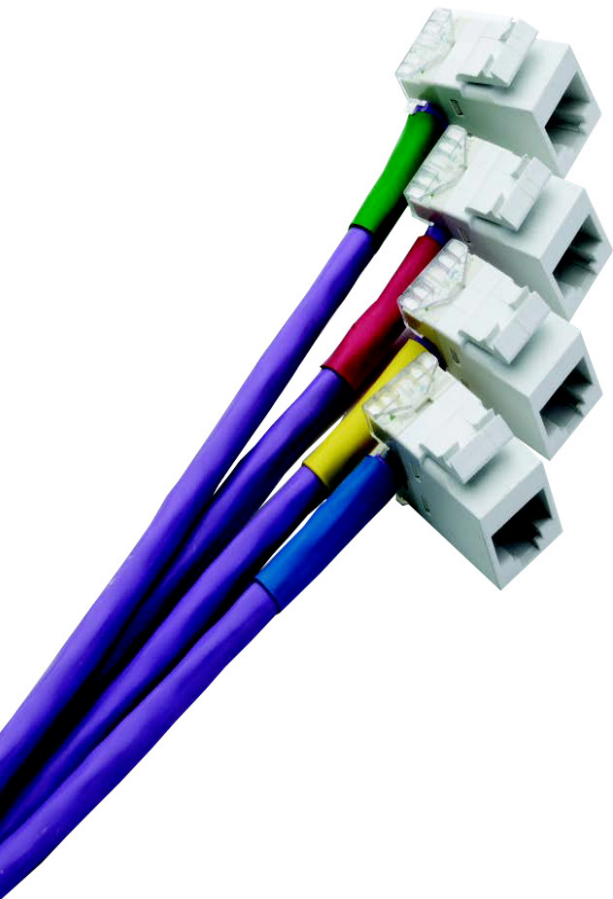

To ensure the correct length links are ordered, Connectix offer training for pre-installation surveys and measuring.

Features & Benefits

- Pre-terminated, pre-tested and colour coded
- Makes on-site installation quick and easy
- Suitable for Cat 6A, Cat 6 & Cat 5e systems
- 25 year warranty available
- Terminated in a quality controlled factory
- 100% tested to relevant cabling standard
- Measuring, pre-installation services and training available
