# UFO System Tools

The Connectix UFO (Unseen Fibre Optics) is a discreet optical fibre cabling system designed for a fast and easy installation within a mixture of FTTX applications. UFO is the ideal solution in MDU retrobuilds where sites may be listed buildings, have congested and overrun pathways and where space for new containment is not an option. There could also be old buildings where the risk of asbestos could be present and new cabling could cause financial or time delay issues. Additionally, for aesthetically pleasing desired new builds and within SMDU or SDU installations, UFO provides a fibre optic consumer installation that's difficult to see and is unobtrusive to the consumer. Connectix UFO can easily be installed along door frames, floor and ceiling skirtings and along corridors within wall/ceiling joins.

The UFO Button is designed to clear up any unsightly engineering works when drilling pass through holes in walls for connecting cables between the UFO Midspan Box and UFO Pebble. Using a small 15mm drill hole, UFO cables can pass through and the button enables a smooth pathway in and out of a wall with an aesthetically pleasing finish.

The UFO Wand is an accessory tool that assists the engineer's installation when passing UFO cable through walls. Available for LC/APC or SC/APC pre-terminated UFO cables.

The Connectix UFO Midspan Fibre Slitter Tool is the specified tool for preparation of the UFO midspan cable within a UFO Midspan box and should be completed by a certified UFO accredited engineer.

The Firefly push grip cable ties are specifically designed for small diameter cables using an application tool, providing industrial strength cable fixings and full compliance with BS7671 18th Edition and BS6701:A1.

The Connectix UFO solution utilises a portable, lightweight, cordless, hotmelt glue gun for quick and easy installation at high level in and around buildings and is suitable for multiple surface types. The glue gun battery power will be maintained in eco mode up to 3.5 hours with a rapid 3-minute warm up time. The Connectix Glue Gun is suitable with 18-20V DeWalt, Makita, Milwaukee or Bosch 18V battery recharge units and is safe to use around carpeted, hard floor and wooden surfaced areas without spillage damage.

UFO System Tools

Features & Benefits

- Aesthetically pleasing Button covers engineers drill holes
- Easy to use wand tools assists fibre installation through walls
- UFO midspan slitter tool for ease of installation
- Use of Firefly clips to maintain compliance with BS6701:A1 and BS7671 18th Edition
- Lightweight, easy-to-use glue gun and surface glue options

Ordering Information	
Product Description	Part Number
Connectix UFO Mushroom Customer entry point	UFO-MUSHROOM-01
Connectix UFO Wand SC/APC Cable Tool	UFO-010-001-01
Connectix UFO Wand LC/APC Cable Tool	UFO-008-001-02
Connectix UFO Midspan Slitter Tool	UFO-001-004-01
Connectix UFO Firefly Clip Pushing Tool	UFO-FF-PT
Connectix UFO Firefly Clips (pack of 100)	UFO-001-004-10
Connectix UFO Glue Gun and Case	UFO-GGK-01
Connectix UFO Glue Gun Battery Unit	UFO-GGK-02
Connectix UFO Glue Gun Hotmelt Stick Gloss Surfaces	UFO-GS-01
Connectix UFO Glue Gun Hotmelt Stick Matt Surfaces	UFO-GS-02
