# UFO System Tools

UFO Tools Features & Benefits

- Aesthetically pleasing Button covers engineers drill holes
- Easy to use wand tools assists fibre installation through walls
- UFO midspan slitter tool for ease of installation
- Use of Firefly clips or Nanoclips to maintain compliance with BS6701:A1 and BS7671 18th Edition
- Lightweight, easy-to-use glue gun and surface glue options

Button

Mushroom

There is a choice of two alternative components when needing to clear up any unsightly engineering works caused by drilling pass-through holes in walls. Using a small 15mm drill hole, UFO cables can pass through, and the mushroom or button provides an aesthetically pleasing finish. The mushroom enables a smooth pathway into the wall/hole whilst the button is a surface mounted solution where a pathway is not required.

The UFO Wand is an accessory tool that assists the engineer's installation when passing UFO cable through walls. Available for LC/APC or SC/APC pre-terminated UFO cables.

The Connectix UFO Midspan Fibre Slitter Tool is the specified tool for preparation of the UFO midspan cable within a UFO Midspan box and should be completed by a certified UFO accredited engineer.

The Connectix UFO solution utilises a portable, lightweight, cordless, hotmelt glue gun for quick and easy installation at high level in and around buildings and is suitable for multiple surface types. The glue gun battery power will be maintained in eco mode up to 3.5 hours with a rapid 3-minute warm up time. The Connectix Glue Gun is suitable with 18-20V DeWalt, Makita, Milwaukee or Bosch 18V battery recharge units and is safe to use around carpeted, hard floor and wooden surfaced areas without spillage damage.

Connectix UFO Nanoclips provide a neat, tidy and almost invisible finish. Their Barbed design grips the substrate for a secure fixing. Corrosion resistant and UV satble, they are suitable for indoor and outdoor use with a meltpoint of >1200°C.
They fit 2mm and 3mm cables, and meet BSi and DIN classifications being 90 & 120 minute fire resistant. Available in White, Black or Brown.

The Firefly push grip cable ties are specifically designed for small diameter cables using an application tool, providing industrial strength cable fixings and full compliance with BS7671 18th Edition and BS6701:A1.

Ordering Information	
Product Description	Part Number
Connectix UFO Mushroom	UFO-MUSHROOM-01
Connectix UFO Button	UFO-Button-01
Connectix UFO Wand SC/APC Cable Tool	UFO-010-001-01
Connectix UFO Wand LC/APC Cable Tool	UFO-008-001-02
Connectix UFO Midspan Slitter Tool	UFO-001-004-01
Connectix UFO Firefly Clip Pushing Tool	UFO-FF-PT
Connectix UFO Firefly Clips (pack of 100)	UFO-001-004-10
Connectix UFO Glue Gun Case Including , 1 x Glue Gun, 1 x Battery Unit, 1 x Charger	UFO-GGK-01
Connectix UFO Glue Gun Battery Unit	UFO-GGK-02
Connectix UFO Glue Gun Hotmelt Stick Gloss Surfaces - box of 122	UFO-GS-01
Connectix UFO Glue Gun Hotmelt Stick Matt Surfaces - box of 122	UFO-GS-02
Connectix UFO Nanoclip™, White 2mm - Pack of 100	UFO-001-005-02
Connectix UFO Nanoclip™, Black 2mm - Pack of 100	UFO-001-005-09
Connectix UFO Nanoclip™, Brown2mm - Pack of 100	UFO-001-005-21
Connectix UFO Nanoclip™, White 3mm - Pack of 100	UFO-001-006-02
Connectix UFO Nanoclip™, Black 3mm - Pack of 100	UFO-001-006-09
Connectix UFO Nanoclip™, Brown 3mm - Pack of 100	UFO-001-006-21
