

Tester & Cable Stripper

Features & Benefits

Connectix Tester

- ✕ Checks shielded and unshielded cabling
- ✕ Identifies Crossover Patch Cords
- ✕ Custom Logo service available

Connectix Cable Stripper

- ✕ Controlled Cutting Depth
- ✕ Encapsulated Blades for Maximum Safety
- ✕ Minimises Damage to wires
- ✕ Custom logo service available
- ✕ Strips UTP, FTP & outer jacket on RG58 and RG59 coax cables

When installing cabling or trying to find a fault, there is often a need for a quick, easy to use tool to verify connectivity. The Connectix Tester brings this tool within everybody's reach in a unique snap-together design making it easy to take on site.

Equally suited to check a single patch cord or a complete channel, the Connectix Tester will give an instant indication of the connections present. Four bi-colour LEDs indicate the status of the pairs in the cabling, with a separate indicator showing the shield connection for shielded systems. The circuitry has been specially designed to identify crossover patch cords.

Specification	
Connectix Tester	
Material	ABS thermoplastic resin, with grade UL94 VO at 1.5mm flame retardancy
Battery	PP3
Tests for	Cross Pair, Open Pair, Short
Indicates	Shield Connection
Remote Indicator	System Linked
Connectix Cable Stripper	
Min. Cable Diameter	5mm
Max. Cable Diameter	8mm
Depth of Cut	0.5mm
Expected Life	5000 Cuts
Material	ABS thermoplastic resin, with grade UL94 VO at 1.5mm flame retardancy

One way of stripping data cables is to use a knife, but the right way to strip data cables is to use the Connectix Cable Stripper. Pocket size, safe and easy to use even in confined spaces.

The fully encapsulated blades ensure a precisely controlled and constant cutting depth, without the risk of nicking the individual wires or your fingers. It just takes one rotation of the stripper to remove the outer jacket of all common shielded and unshielded data cables up to a diameter of 8mm.

As an added advantage, the Connectix Stripper can also be used to strip the outer jacket of RG58 and RG59 size Coaxial Cables without the damage to the outer shield that seems inevitable when a knife is used.
