

Our braided sleeving offers a flexible cable protection, high abrasion resistance and ease of application. The special braid construction permits the sleeving bore to be expanded up to 300%.

This is suited for the mechanical protection of wire harnesses, hoses and all other applications where exceptional flexibility combined with superior abrasion/cut resistance is required. It also serves as an economical means for wire bundling that will not trap heat or moisture, expanding over irregular shapes, and then contracting to conform and grip.

Recommended for covering cables or cable bunches or hoses of overall diameter.

### Specifications

Material	Polyester
Operating Temp Range	-50C to +150C intermittent +2200C.
	Melting Point +2500C
Tensile Strength	100,000 PSI
Flammability	UL 224 VW -1 - Low Smoke - Zero Halogen
Halogen Free	ROHS Compliant

### Ordering Information

Braided Sleeving 35-64mm 25m roll
